

I pay for the service of XM satellite radio it is my right to do this what give you the right to say what I can listen to. I like the choice that I do not have to listen to radio ads. I also have the opion that XM radio is safer, as I do not have to search for stations and that I can find traffic and weather stations with the touch of one button.XM radio is the only kind of radio that I will listen from now on.
